

NEW Practice Scenario AND Sneak Peek into a REAL Review Board!

POSTED 11/24/2018

Hi all!

Ever want to see what it looks like during a REAL Review Board? We know you do!

So, we VERY INFORMALLY captured CTA Carl Brundage delivering this RB exam presentation and he was gracious enough to let us share it with our awesome Architect Community!!

A couple things to note:

- Carl CHOSE to draw all of his artifacts LIVE during the presentation portion of the exam. He could have created the artifacts during the solution/preparation portion of the exam...but he had practiced extensively and decided that this style worked best for him!
- There was a Q&A portion after the presentation that we did not record. Sorry!
- We know you can't see all of his diagrams in great detail in the video but we still wanted to give you a view of what the real thing can look like....and most importantly...you can hear the level of detail he is going into as he presents his solution.
- We are also releasing the "Greenhouse Recycling" scenario to help with your preparation. **We highly recommend you use the scenario for a mock RB for yourself....AND THEN...watch Carl as he presents his solution.**
- Please do not distribute the video...it is being made available only for official community use.

Thank you, Carl!!!!
